No external binary or raw XML evidence artifacts were attached for this campaign run.

7. Integrated Report Analysis, Risk Interpretation & Remediation

Risk Interpretation (Low — 28.8/100):
Confidence Profile: 0 confirmed, 0 potential, 0 false positive • CVEs Referenced: None recorded
• Observed items are primarily moderate/informational configuration exposures without confirmed critical remote exploitation paths in scanned scope.

Prioritized Remediation Roadmap:
1. High Priority (1 High): Remediate high-severity vulnerabilities and enforce strict access controls (Campaign A Finding).

Assessment Limitations & Coverage Verification: All enabled modules executed cleanly within authorized scope.
Scope Notice: Findings strictly reflect the authorized targets, selected modules, and host permissions active at execution time.
