FootprintIQ — Technical Security Assessment Report

Campaign: **Live WebApp Audit Campaign** • Recon ID: **FIQ-REC-20261111-0002** • Purpose: **Full WebApp RBAC & Analysis Verification** • Assessment Date: 2026-11-11T14:08:53 • Generated: November 11, 2026 14:08 UTC • Generated By: **investigator1** • Outcome: **Authorized**

1. Technical Methodology & Exposure Summary

This technical deliverable documents the verified reconnaissance and vulnerability assessment executed under Campaign **FIQ-REC-20261111-0002**. Results combine executed modules across passive intelligence, active port/service discovery, and enabled vulnerability assessment engines. Aggregate risk index: **0.0 / 100 (Minimal Exposure)** across **0 security finding(s)** and **0 open port(s)**.

Critical	High	Medium	Low	Informational	Open Ports	Risk Score
0	**0**	**0**	**0**	**0**	**0**	**0.0/100 (Minimal)**

Severity Distribution: Critical: 0 | High: 0 | Medium: 0 | Low: 0 | Informational: 0

2. Selected Scan Methods & Assessment Scope

Selected Categories: Passive, Active • **Passive Modules:** whois_lookup, dns_enumeration • **Active Options:** custom • **Vulnerability Engines:** None

Target	Type	Description	Scope Basis	Exclusions
192.168.56.111	ipv4	Live WebApp Audit Campaign Target	192.168.56.111 authorized scope	None

5. Detailed Vulnerability Findings (Technical Breakdown)

No vulnerability findings recorded in this campaign.

6. Collected Evidence References & Integrity Verification

No external binary or raw XML evidence artifacts were attached for this campaign run.

7. Integrated Report Analysis, Risk Interpretation & Remediation

Risk Interpretation (Minimal — 0.0/100):
Confidence Profile: 0 confirmed, 0 potential, 0 false positive • CVEs Referenced: None recorded
• Risk remains indeterminate for incomplete or failed scanner stages until those checks complete cleanly.

Prioritized Remediation Roadmap:
1. Maintain periodic scheduled reviews and disable any unnecessary exposed network services.

Assessment Limitations & Coverage Verification: All enabled modules executed cleanly within authorized scope.
Scope Notice: Findings strictly reflect the authorized targets, selected modules, and host permissions active at execution time.
