# FootprintIQ — Active Recon Security Assessment Report

Investigation: **test1** • ID: **FIQ-REC-20261111-0065** • Scan Run: **Run 002** (SCAN-20261111-192527-9b93, Duration: 0s) • Purpose: **Repeatable multi-run audit** • Assessed: 12 Nov 2026, 12:55 AM IST • Generated: 12 Nov 2026, 12:55 AM IST • Generated By: **investigator1** • Outcome: **partially_completed**

## 1. Executive Overview & Security Posture

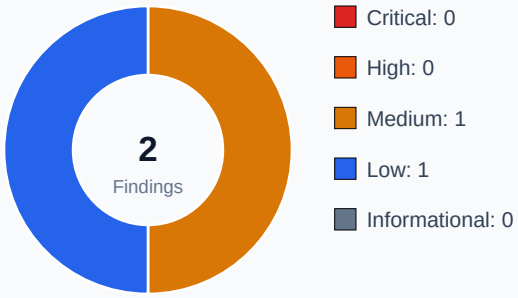
This report summarizes security exposures identified during Investigation **test1** (FIQ-REC-20261111-0065). The overall calculated risk rating is **28.8 / 100 (Low)** across **1 scoped asset(s)**, **0 exposed service port(s)**, and **2 security finding(s)**, including **0 Critical** and **0 High** severity items.

| Critical | High | Medium | Low | Informational | Open Ports | Risk Score |
|---|---|---|---|---|---|---|
| **0** | **0** | **1** | **1** | **0** | **0** | **28.8/100 (Low)** |

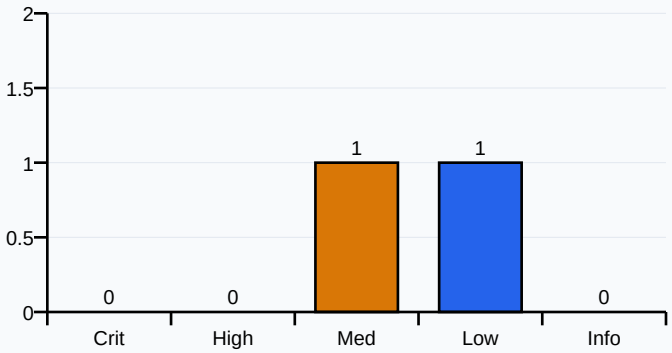
**Severity Distribution:** Critical: 0 | High: 0 | Medium: 1 | Low: 1 | Informational: 0

## 1B. Visual Risk & Coverage Analytics

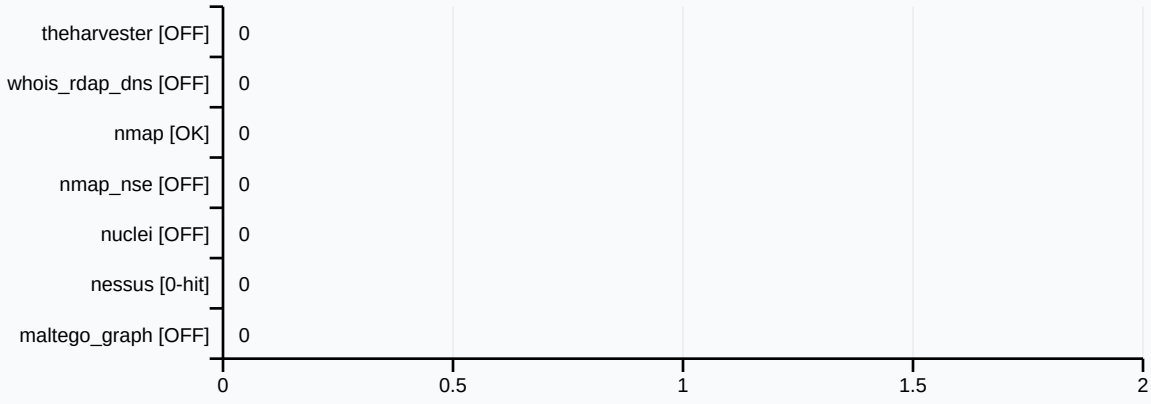
### Severity Distribution Breakdown

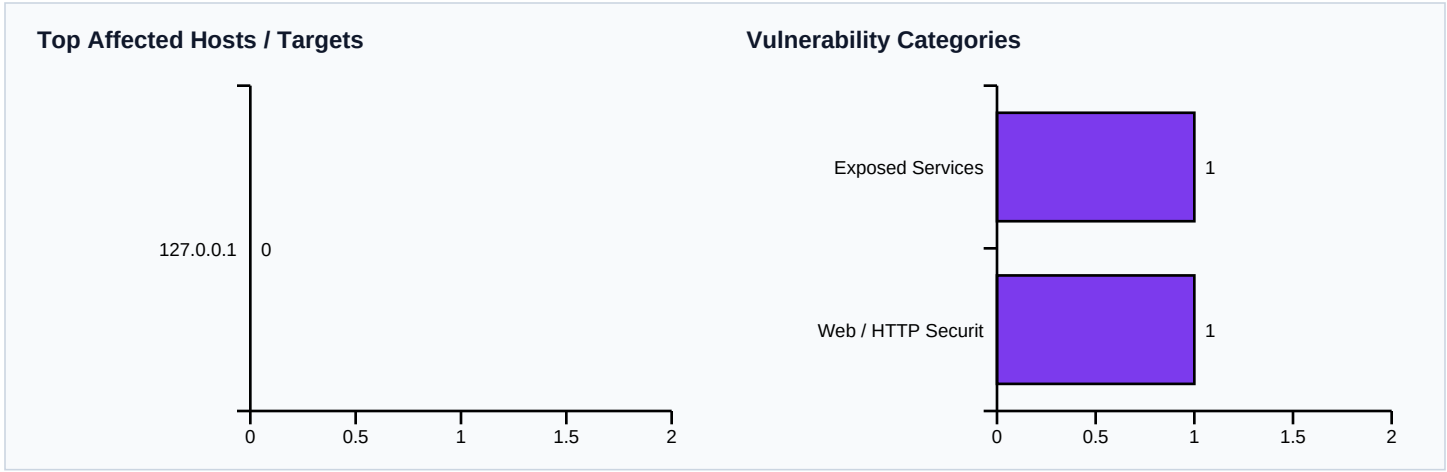


### Severity Counts (Non-Empty Buckets & Scale)



### Scanner Coverage & Deduplicated Findings by Tool





## 2. Selected Scan Methods & Assessment Scope

**Selected Categories:** Combined • **Passive Modules:** None • **Active Options:** None • **Vulnerability Engines:** None

| Target | Type | Description | Scope Basis | Exclusions |
|---|---|---|---|---|
| 127.0.0.1 | ipv4 | test1 Target | 127.0.0.1 authorized scope | None |

## 5. Key Findings & Plain-Language Risk Explanations

**#1: SSH Weak MAC Algorithms Enabled** — **Medium** (Unverified / Informational)

**What was discovered:** SSH Weak MAC Algorithms Enabled was observed on 127.0.0.1 on TCP port 22 running ssh.

**Why it matters:** Still detected on port 22.

**Potential impact:** Moderate risk: Partial information disclosure, weaker transport protection, or service hardening gap.

**Recommended action:** Disable legacy MACs in sshd_config.

**#2: HTTP Server Banner Exposed** — **Low** (Unverified / Informational)

**What was discovered:** HTTP Server Banner Exposed was observed on 127.0.0.1 on TCP port 80 running http.

**Why it matters:** Server banner visible.

**Potential impact:** Low risk: Minor configuration leakage that can assist attackers during reconnaissance.

**Recommended action:** Suppress Server header.

## 6. Collected Evidence References & Entity Graph Attribution

No external binary or raw XML evidence artifacts were attached for this campaign run.

## 7. Integrated Report Analysis, Risk Interpretation & Remediation

**Risk Interpretation (28.8 / 100 (Low)):**
Confidence Profile: 0 confirmed, 0 potential, 0 false positive • CVEs Referenced: None recorded
• Observed items are primarily moderate/informational configuration exposures without confirmed critical remote exploitation paths in

scanned scope.

**Prioritized Remediation Roadmap:**
1. Moderate Priority (1 Medium): Address hardening gaps, TLS/protocol upgrades, and configuration weaknesses.

**Assessment Limitations & Coverage Verification:** Scan SCAN-20261111-192527-9b93 (Active (Nmap Only)) ended with status 'partially_completed'.
*Scope Notice: Findings strictly reflect the authorized targets, selected modules, and host permissions active at execution time.*

## 8. Historical Scan-Run Trend & Baseline Comparison

| Run | Scan Type | Executed (IST) | Status | Crit/High | Total | Risk Score |
|---|---|---|---|---|---|---|
| Run 001 | Combined (Nmap + Nuclei) | 12 Nov 2026, 12:55 AM IST | completed | 0 / 1 | 2 | 47.6/100 |
| Run 002 | Active (Nmap Only) | 12 Nov 2026, 12:55 AM IST | partially_completed | 0 / 0 | 2 | 28.8/100 |

**Baseline Comparison (Run 001 → Run 002):** New Findings: **1** • Verified Resolved: **0** • Persistent: **1** • Not Reassessed: **1** • Risk Score Delta: **-18.8**
• *Note: Selected scanners differ between the two scan runs; findings from unexecuted scanners cannot be compared directly.*
• *Note: One or both compared runs ended incomplete/failed; differences may reflect partial coverage rather than actual remediation.*
• *Note: Scanner versions/configurations differed between runs.*
• *Note: 1 earlier finding(s) were NOT marked resolved because their detecting scanner did not complete in the newer run.*
